Partners involved : TVDC, ET, HT, KAIROS, INRAE, UOC, UOP

## Content

As the project delivered more and more results, partners had a lot of information to share with the communities of composites, biomaterials, automotive, advertising and sailing industries.

Consequently, partners attended several conferences and shows, in which they either presented the project and its results or presented posters.

Besides, to carry out certain tasks it was necessary to attend presentations from experts of the biocomposite field.

Below is a list of all the shows the partners attended during the project. When available, photos of the event are added in the table below.
